game is miniature from being  
into rich humus. There  
ways to compost: aerobic (with air)  
and anaerobic (without air).  
one form of them the compost  
should decompose and be ready  
use in about three to four weeks  
when it turns dark brown, moist,  
and earthy smelling, it's ready for  
the garden. With so many gardens  
in Wallburg, this method helps  
our environment stay beautiful.

**Fishing Update:** Anglers  
trout are assaulting hooks at  
**Creek.** Free of ice, some of the  
hottest trout fishing in the area  
will be at the lake as it warms up.  
Anglers will be jigging for trout  
at the north end. The dock is open  
and the park is open for business.  
Already soaking baits at the lake  
and at the park, fishermen are  
ing up some fairly decent trout.
